

## Construction & Demolition Waste Management (CWM) Plan

Project Name:		
Address:	Contractor	
Phone:		
Project Manager:		
Waste Hauling Company: Solid Waste of Willit	s, 351 Franklin St. Willits, (707) 459-4845	
<ul> <li>All Subcontractors shall comply with the Management Plan.</li> </ul>	project's Construction Waste	
All Subcontractor foremen shall sign the	e CWM Plan Acknowledgment Sheet.	
The project 's overall rate of waste diversion will be(check one):		
	□ 50% □%	
50% diversion is required unless applicant shows that it can't b	pe reached.	
The chart on the next page identifies the waste materials that will be generated on this project, the diversion strategy for each waste type and the anticipated diversion rate.		
<b>COMMINGLED OPTION:</b> Hauling company will provide a commingled drop box at the jobsite for most of the construction waste. These commingled drop boxes will be taken to Solid Waste of Willits. The average diversion rate for commingled waste will be%. Additional drop boxes will be used for particular phases of construction (e.g., concrete and wood waste) to ensure the highest waste diversion rate possible.		
<b>SOURCE-SEPARATE OPTION</b> : In the event that the waste diversion rate achievable via the strategy described in (6) above, is projected to be lower than what is required, then a strategy of source-separated waste diversion will be implemented. Source separated waste refers to jobsite waste that is not commingled but is instead allocated to a debris box designated for a single material type, such as <b>clean wood or metal</b> .		
Notos		

## Notes:

1. HAULINGCOMPANY] will track and calculate the quantity (in tons) of all waste leaving the project and calculate the waste diversion rate for each debris box.

- 2. If Contractor or Subcontractors furnish their own dump trailers, invoices must be saved to track diversion and disposal out of each load.
- 3. For separated loads of recyclables (for example, wood or metal), invoices or other statements must be kept showing the quantity, regardless of where it goes.

How materials will be recycled (check your choices):

	,	<i>j</i>		
Material	Separated out of mixed load by transfer station	Separate on-site into hauler recycling bin	Separated on-site and self-hauled to recycling depot	Other (explain)
Cardboard & paper				
Asphalt & concrete				
Scrap metal				
Wood				
Roofing materials				
Drywall				
Landscape debris				
Re-usable fixtures				
Other:				
Other:				

Keep receipts & records of RECYCLING and TRASH to document your attainment of your waste diversion goal.

For information and assistance, call the City of Willits, Building and Safety Dept. (707) 459-7122

## CONSTRUCTION WASTE MANAGEMENT ACKNOWLEDGEMENT

DATE	SUBCONTRACTOR	FOREMAN	SIGNATURE

## **Contractor (Document Author's / Designer's Declaration Statement)**

- I certify that this Certificate of Compliance documentation is accurate and complete.
- I certify that the features and performance specifications for the design identified on this Certificate of Compliance conform to the requirements of Title 24, Part 11 of the California Code of Regulations.
- I certify that all subcontractors shall comply with the project's construction and waste management plan.
- The design features identified on this Certificate of Compliance are consistent with the information documented on other applicable compliance forms, worksheets, calculations, plans and specifications submitted to the enforcement agency for approval with the permit application.
